To Whom it May Concern

Re: Expert Services of Thomas J. Berger, M.D.

I am writing this letter to recommend highly Thomas J. Berger, M.D. as a consultant and expert in cases involving complex medical issues.

I contacted Dr. Berger in the fall of 2012 about a medical malpractice case pending in my home state of South Carolina in which I represented a young man who had been severely injured by what I thought was a physician's negligence. Dr. Berger first reviewed a select set of medical records so he could advise me whether he thought the case was worth pursuing from a medical causation standpoint. After reviewing those records, he asked me to send him the entire set of medical records for an in-depth analysis because his preliminary review seemed promising.

When I sent Dr. Berger the more than twelve hundred pages of medical records along with certain other file materials, I gave him the bad news that I needed a quick turnaround because my deadlines were fast approaching. Dr. Berger wasted no time and devoted himself to reviewing and analyzing the records and forming his opinions. Once he had reached his opinions, he immediately called me to discuss them. After speaking with him, I asked him to provide me with a written report which I would need for a mediation which was fast approaching. Again, Dr. Berger devoted himself to writing the report which was completed with multiple references to the details contained in the medical records as well as to relevant medical literature. I know for a fact that he worked late into several nights completing his report so I would have it within the short turnaround time for which I had asked.

The report I received was masterfully written and extremely persuasive, and I do not say this just because I represented the Plaintiff in the case. Rather, when we reached mediation a few days after Dr. Berger provided his report to me, the very experienced mediator made a special effort to tell me how impressed he was with Dr. Berger's report. I am happy to say that I was able to settle the case at that mediation thanks in large part to Dr. Berger's dedicated work, thorough research, and well written and convincing analysis which pointed blame where it belonged – at the Defendant.

I cannot promise you that Dr. Berger will deliver an opinion that is in your client's favor. However, I am totally confident that whatever opinion you do receive from him will be done in a highly capable manner and will reflect as close to the truth as medical science allows. I don't think one can ask for anything beyond that from any expert. Dr. Berger delivers!

Very truly yours,
