PROFESSIONAL SUMMARY:

I have over thirty years experience as a fire and explosion investigator and over twenty-three years experience in the fire service as both a career and volunteer firefighter. During my tenure as a company commander, it was my responsibility to determine the origin and cause of fire and explosion damage.

I expanded my knowledge in the field of fire and explosion investigation by obtaining a formal education with an Association Degree in Fire Science Technology and a Bachelor of Science Degree in Fire and Safety Engineering Technology majoring in Arson Investigation.

I enhanced my expertise by obtaining the status of Certified Fire Investigator, Certified Fire and Explosion Investigator, Certified Fire/Arson Investigator through the North Carolina Department of Insurance and Certified Vehicle Fire Investigator.

As fire investigator, I have qualified as an expert witness in state and federal courts. My areas of expertise include product failure analysis; subrogation; fire and explosion investigations in residential and commercial structures; passenger, commercial, and recreational vehicles; marine vessels; fire codes, standards, and safety analysis.

PROFESSIONAL EXPERIENCE:

01/01/00 – Present **Forensic Fire Consultants, Inc.**
104 Silvercliff Trail
Cary, North Carolina 27513
Senior Fire & Explosion Analysis

I am responsible for directing all phases of daily business operations including budget analysis, data processing, and staff development. I am also responsible for determining the origin and cause of fire and explosion damage, analysis of code violations (electric, building code, et.), report writing, collection and preservations of evidence, computer generated diagram and animations, testifying as an expert witness, supervising staff investigators, engineers, and other professionals in failure analysis and research. I am certified to teach fire and criminal investigation courses to adjusters, firefighters, and law enforcement personnel. These courses are certified through Durham Technical Community College, North Carolina Department of Insurance and the National Fire Academy. Additional duties include supervising co-op students from Durham Technical Community College in the field of fire and explosion investigation.

03/08/99 – 12/31/99 **Forensic Analysis & Engineering Corporation**
