

DAVID E. PEARSON

President

David E. Pearson has more than 40 years of experience in construction management, contract management, scheduling and dispute resolution. He has provided consulting services on hundreds of construction projects across North America and has been accepted as an expert in more than 100 federal and state court cases and arbitrations across the U.S. He also has served as an arbitrator and mediator.

Mr. Pearson started Pearson Management Group, Inc. in 1989. Pearson has been retained by governmental agencies and many of the largest U.S. and international companies, including Morgan Stanley, Barclays, State of Georgia, Federal Express, State of Mississippi, Retirement Systems of Alabama, Florida Power and Light, Georgia Pacific, Endeck Energy Services, Harrah's Entertainment, and SMS Seimag.

Prior to starting Pearson Management Group, Mr. Pearson was co-founder, Vice-President, and General Manager of an American subsidiary of an international construction consulting firm in Montreal, Canada. During the early '80s, he was also the Contracts Manager for Blount, Inc., one of America's largest construction firms. Mr. Pearson began his career by spending seven years on construction sites as a project engineer, estimator and project manager.

David Pearson personally manages or oversees all projects that Pearson Management undertakes. Pearson Management's revenues have been almost evenly divided between construction management consulting and forensic investigations. The following provides examples of Pearson's management consulting assignments, forensic investigations and a listing of the 600+ projects on which Pearson has provided consulting and forensic services, as well as publications and testimony.

MANAGEMENT CONSULTING

Georgia-Pacific Paper Mill

Location: Cedar Springs, Georgia

Construction Value: \$60 million

Client: Georgia-Pacific

Start Date: 1990

End Date: 1991

Pearson provided on-site program management of this boiler replacement project performed during a summer/fall shutdown. Work was performed 24 hours, seven days a week and scheduled by the hour. Pearson chaired the construction site meetings and worked with the Owner to overcome schedule delays such that the project was completed on time.

ThyssenKrupp Steel Mill

Location: Mobile, Alabama

Construction Value: \$6 Billion

Client: SMS Seimag, Dusseldorf, Germany

Start Date: 2009

End Date: 2010

Pearson provided change order and claim management services to the largest subcontractor on a steel mill in Mobile, Alabama. SMS Seimag provided the steel making and steel coating equipment to ThyssenKrupp under a contract valued in excess of \$1 billion.

Mississippi Gulf Coast Regional Infrastructure Program (Katrina Recovery)

Location: Mississippi Gulf Coast Region

Construction Value: \$700 million

Client: Mississippi Department of Environmental Quality/Mississippi Development Authority

Start Date: 2008

End Date: 2010

As a result of Hurricane Katrina, the Federal government provided to the Mississippi Department of Environmental Quality (MDEQ) funding for approximately 700 miles of new potable water lines, approximately 14 small water treatment plants and 20 water tanks in six coastal Mississippi counties. When design and construction did not proceed as planned, Governor Haley Barbour mandated the hiring of an outside firm to manage design, land acquisition, and construction. Pearson was selected. After an initial audit of the circumstances, Pearson developed a new schedule, monitored actual progress and worked with local authorities to remove obstacles and achieve timely completion.

Soldier Field Stadium Renovation

Location: Chicago, Illinois

Construction Value: \$632 million

Client: Chicago Bears

Start Date: 2000

End Date: 2003

Pearson provided contracting strategy, construction oversight, scheduling and claim resolution to the Chicago Bears football team on the \$640-million 20-month renovation of Soldier Field in downtown Chicago. This project was completed on time for the September 29, 2003 Green Bay Packers versus Chicago Bears Monday Night Football game. The project was constructed in a congested urban area and much of the work was performed under a seven-day-per-week, 24-hour-day construction schedule, which was the fastest constructed NFL stadium in history. The stadium consists of 1,200 piles, 10,000 tons of steel, 350,000 square feet of precast, significant infrastructure revisions and only 20 months was allowed for construction. Pearson also performed constructability reviews of design drawings and worked with the design and construction team to identify controlling trades, access issues, and manpower needs early in the design process. As design work continued, Pearson prepared detailed planning, scheduling and production requirements necessary to achieve planned completion.

Revel Entertainment

Location: Atlantic City, New Jersey

Construction Value: \$2.6 billion

Client: Morgan Stanley

Start Date: 2008

End Date: 2011

At the onset of the 2008 financial crisis, Morgan Stanley retained Pearson to audit ongoing design and construction of the \$2.6 billion Revel Casino in Atlantic City, NJ. Shortly thereafter, Morgan asked Pearson to provide budget and schedule models for slowing construction. Pearson led a group of design and management personnel that developed three such models. After selection of one of those models Morgan retained Pearson to provide on site management of funding, design and construction through early 2011, when Morgan sold its interest in the property. The Revel Casino is a 47-story, 1,900-room hotel with more than 500,000 square feet of entertainment space. The hotel tower is the tallest structure in Atlantic City and the second tallest in the State of New Jersey. The property will include 20 restaurants, 40 retail shops and a 5,000 seat arena.

The Westin Diplomat Resort & Country Club

Location: Hollywood, Florida

Construction Value: \$800 million

Client: National Plumbers and Pipefitters Union

Start Date: 1999

End Date: 2010

Construction of this south Florida mega-resort was funded by the Plumbers and Pipefitters Union. When the project was about 30% complete, the U.S. government determined that some of the funding was inappropriate. Pearson and its joint-venture partner were retained to provide on-site management of disbursements, design, construction, scheduling, document control, change order and claim management. At the peak, Pearson and its joint-venture partner employed more than 20 personnel on the project. This resort is a 40-story, 998-room five-star hotel with more than 1,250,000 square feet of guestroom, parking, terrace, and pool deck; connected to an eight-story convention center with more than 800,000 square feet of convention/meeting space, parking and terraces. Adjacent to the hotel and convention center is a hotel support

development with retail, courtyard, parking and mechanical areas of approximately 700,000 square feet. The Westin Diplomat Resort & Spa boasts the largest and most complete Convention Center and meeting facilities in South Florida. In addition, there is a detached Country Club facility with a championship golf course, tennis center, a European-inspired spa and an array of dining options.

Montgomery Hotel & Convention Center Expansion

Location: Montgomery, Alabama

Construction Value: \$200 million

Client: Retirement Systems of Alabama

Start Date: 2007

End Date: 2008

The Retirement Systems of Alabama booked convention events based on projected project completion dates. When this project was approximately 50% complete and trending to complete months after its planned opening date, Pearson was retained to provide scheduling and management consulting services to assist the contractor, designer and owner in achieving timely completion. Pearson prepared new completion schedules, monitored actual progress and chaired weekly schedule meetings. The project was completed on time. This project included the remodeling of an existing convention facility and addition of a four-star 350-room hotel, additional meeting space, restaurants, retail outlets, 8,000 square foot European style spa and an 1,800-seat performing arts theater. All work occurred in a tightly constrained downtown area, abutted on all sides by streets busy during the day, thus requiring detailed logistics planning for materials, equipment and labor.

Harrah's Jazz Casino

Location: New Orleans, Louisiana

Construction Value: \$800 million

Client: Harrah's Entertainment

Start Date: 1998

End Date: 2000

Pearson and its joint-venture partner provided on-site program management of design and construction for the only land-based casino in Louisiana, the \$800 million Harrah's Jazz Casino in downtown New Orleans. This project included almost one million square feet on four levels. The lower basement level is used for valet parking while the upper basement level includes administrative offices. The main floor contains 100,000 square feet of gaming space, rivaling any casino in Las Vegas.

Project V

Location: Las Vegas, Nevada

Construction Value: \$10 billion

Client: Stations Casino

Start Date: 2004

End Date: 2005

Pearson was a member of a small group assembled to provide initial master program planning and development during conceptual and design development of Station Casino's mega-resort to be named "Viva." The project was programmed at 7,000,000 square feet,

to be constructed over 50 acres, and to be completed in four phases during a period of 3½ years. Viva consisted of a 30-story hotel of more than 3,500 rooms, 250,000 square feet of gaming space, a 100-room bungalow hotel and pool complex, 10 restaurants, a central plant, two parking garages and employee parking lots. Pearson worked for more than a year before Stations shelved the project due to exceptional rising costs and shortage of resources in Las Vegas at the time.

FORENSIC INVESTIGATIONS

Cogeneration Energy Plant

Location: Newark, New Jersey
Construction Value: \$250 million
Client: National Steel Erectors
Start Date: 1993
End Date: 1995

Pearson provided deposition and Federal Court trial testimony regarding the piping contractor's change order, schedule and labor inefficiency claims.

Appomattox Bio Energy Ethanol Plant

Location: Hopewell, Virginia
Construction Value: \$175 million
Client: Osage Bio Energy
Start Date: 2009
End Date: 2011

Pearson provided deposition and Arbitration testimony regarding the Owner's termination for convenience of the contractor.

Harrah's Katrina Insurance Claim

Location: Gulf Coast, Mississippi
Construction Value: \$1 billion
Client: Harrah's Entertainment
Start Date: 2007
End Date: 2009

Hurricane Katrina destroyed two of Harrah's south Mississippi properties, resulting in a near \$1 billion claim against a consortium of international insurance firms. Pearson was a member of a small group of consultants retained by Harrah's to calculate Harrah's claim and to negotiate settlements. All claims were successfully settled.

Cogeneration Facility

Location: Turner Falls, Massachusetts
Construction Value: \$50 Million
Client: Endeck Energy Services
Start Date: 1994
End Date: 1997

This project was plagued with many design and construction errors. On behalf of the Owner, Pearson analyzed the design and construction issues and the contractor's delay and inefficiency change orders and presented its findings in arbitration.

John and Anne Wilson Music and Arts Center

Washington & Lee University

Location: Lexington, Virginia

Construction Value: \$600k

Client: Brice Building Company

Start Date: 2006

End Date: 2009

The general contractor terminated for default its concrete subcontractor and sought damages from the defaulted subcontractor. Pearson provided deposition and trial testimony regarding the subcontractor's default and the general contractor's damages.

Georgia World Congress Center – Phase IV

Location: Atlanta, Georgia

Construction Value: \$251 Million

Client: Georgia State Financing & Investment Commission

Start Date: 2003

End Date: 2007

Pearson evaluated the Construction Manager's and several trade contractors' delay and damage claims on a 420,000 square foot expansion to this mega-convention center in downtown Atlanta.

Tank Explosion

Location: Catawba, South Carolina

Construction Value: \$30 Million

Client: Bowater

Start Date: 2002

End Date: 2004

Pearson provided deposition and State Court trial testimony regarding construction management standards.

Bamagas Pipelines

Location: North Alabama

Construction Value: \$27 Million

Client: Enbridge, Inc.

Start Date: 2005

End Date: 2005

Pearson evaluated the contractor's delay claims against owner using a detail as-built schedule on underground pipeline across three counties.

Jefferson County Sewer Projects

Location: Jefferson County, Alabama

Construction Value: \$100 Million

Client: Jefferson County Sewer Board

Start Date: 2003

End Date: 2005

After auditors determined that the Jefferson County Sewer Board did not have adequate funds to pay for construction of three large tunneling and piping projects already under contract, the Sewer Board terminated those contracts for convenience. The Sewer Board employed Pearson to evaluate and negotiate settlements of each of the contractor's termination for convenience claims. Some of the contractors had purchased specialized tunneling equipment that could not be utilized on other tunneling projects ongoing in the United States. All claims were successfully resolved.

PROJECTS (BY TYPE ALPHABETICALLY)

Airport

Municipal Airport Runway Extensions - Fairhope, AL
Aircraft Protective Coating Facility - Tinker AFB, OK
Hanger for Air Force One - Bethesda, MD
Northrop Aircraft Facility - Valdosta, GA
FAA Airport Traffic Control Tower - Montgomery, AL
