## Do you need Healthcare and Medical Expertise To Win Your Cases?

### We help attorneys save time and money by:

#### **Providing Expert Witnesses**

Improve the strength of your case by retaining Med League to locate well-qualified healthcare experts, including physicians, nurses, dentists, administrators, therapists and others.

#### **Screening Medical Malpractice Cases**

Save time and money by letting Med League's experts screen medical malpractice cases for merit. Plaintiff attorneys will avoid taking non-meritorious cases, and receive an analysis of the strengths and weaknesses of the potential claim.

#### **Developing Case Chronologies**

Save time, improve productivity, and free up your law firm's staff. A case chronology helps you quickly and easily understand the sequence of events, injuries, illnesses, and treatment. Do you need rapid access to data? You'll receive a medical summary which provides a snapshot of the plaintiff's injuries and treatment in layperson's terms. We'll identify the pre-existing conditions, and uncover potential problems with the client and case.

#### **Preparing Timelines**

Facilitate settlement of cases by understanding the details of events and treatment. Our timelines are used as demonstrative evidence to help the jury or adjuster comprehend the scope of medical care.

#### **Performing Literature Searches**

Increase your success in winning cases with authoritative literature related to the facts of the case. Literature searches help you to identify non-meritorious cases or support your client's position and can be used to cross-examine an expert.

#### **Preparing Pain and Suffering Reports**

Our nurses will help your firm prepare fully reliable and accurate reports on patients' levels of pain and discomfort during treatment and post incident. Our reports will be organized, easy-to-present and easy-to-understand in the courtroom.

#### **Organizing Medical Records and Bills**

Increase your productivity and save time by asking Med League to organize the medical file. This permits you to have quick access to information and identifies key missing records which can be crucial to a case while there is still time to obtain these documents.

#### **Transcribing Medical Records**

If you can't read the handwriting, you don't know what is in the record. Increase your access to information by retaining us to provide a verbatim transcription of key documents.
