## PROFESSIONAL

### UNIVERSITY BASIC LABORATORY RESEARCH EXPERIENCE

1. Human Immunobiology Group, University of California, Los Angeles, Drs. John Fahey and Andrew Saxon (1976-1977).
2. Immunobiology Research Center, University of Wisconsin under the direct supervision of Drs. Fritz H. Bach and Richard Hong (1970 and 1972).

## GRANTS

I was principal investigator

1. Boxer, R.J., Skinner, D.G., Kaufman, J.J., Elashoff, R. and Waisman, J.: Adenocarcinoma of the Prostate. Correlations of Clinical and Histological Data. USPHS Grant (5P01-CA-16042-03. Cancer Care Grant to UCLA Medical Center. (\$2200), 1977
2. Boxer, R.J. and Brosman S.: Urethral Substitution with Replamineform Prosthesis. Harbor General Professional Staff Association. NIH SO7RR05551-14. October 1, 1976-June 30, 1977 (\$3000).

## CLINICAL RESEARCH EXPERIENCE

In each of the following clinical research investigations as a principal of the Affiliated Research Associates (a group of 20 private urology groups of which I was one of the founders), the pharmaceutical was tested through strict IRB and FDA rules:

A long-term, open-label clinical study evaluating the safety and efficacy of -----in subjects with symptomatic benign prostatic hyperplasia (BPH). 2000, Sub-Investigator.

A dose-range-finding, double-blind, randomized, multi center, active-comparator-controlled extension study to determine the effect of -----in postmenopausal women with predominantly urge urinary incontinence. 1999, Sub-Investigator.

Transdermal ----- in patients with urge urinary incontinence: a 12 week, multi-center, randomized, double-blind, placebo-controlled study with a 12 week open label, dose-titration, safety extension. 1999, Sub-Investigator.

A phase III, six-month, long-term, open-label, flexible dose, safety extension study of -----tablets (2, 3 and 4mg) in the treatment of male erectile dysfunction. 1999, Sub-Investigator.

Extended safety and efficacy study of -----implant in patients with prostate cancer. 1999, Sub-Investigator.

A phase III, multi center, double-blind, randomized, placebo controlled, parallel group study of the efficacy and safety of controlled release -----versus tolterodine in the treatment of subjects with overactive bladder. 1999, Sub-Investigator.

A randomized double-blind placebo controlled phase III trial evaluating -----plus standard therapy versus placebo and standard therapy in patients with recurrent carcinoma of the prostate who are asymptomatic with castrate levels of testosterone and have rising PSA levels without radiologically-evident metastatic disease. 1999, Sub-Investigator.

A phase III efficacy and safety study of -----3mg tablets versus placebo and -----3mg versus -----4mg tablets in the treatment of male erectile dysfunction. 1999, Sub-Investigator.

A dose-range study to evaluate (s)-oxybutynin, placebo, and ----- when administered to female subjects with unstable bladder conditions. 1999, Sub-Investigator.

Safety and efficacy of -----tablets in men with bladder overactivity and coexisting bladder outlet obstruction. A multinational, randomized, double blind and placebo-controlled 12 weeks study. 1999, Sub-Investigator.

A randomized, double-blind, multi center, phase III study of -----and Ciprofloxacin in the treatment of chronic bacterial prostatitis. 1999, Sub-Investigator.

A study to determine the minimum perceptible difference for each of five quality of life questionnaires for patients with BPH. 1999, Sub-Investigator.

Effect of Computer-Base Support on Prostate Cancer Treatment Decisions. 1999, Principle Investigator.

A phase II/III, double-blind, placebo-controlled, dose-finding study of the safety and efficacy of ---- in patients with symptomatic benign prostatic hyperplasia. 1999, Sub-Investigator.

A phase III, two year, long-term, open-label, flexible dose, safety extension study of ---- tablets in the treatment of male erectile dysfunction. 1998, Sub-Investigator.

A phase II, multicenter, parallel, randomized, double masked, placebo-controlled, dose-ranging study to test whether oral administration of ---- to patients with diabetes-related erectile dysfunction improve erectile function. 1998, Sub-Investigator.

An eleven-week, open label, randomized, multicenter, parallel-design, placebo lead-in study of ---- capsules, 0.4 mg daily versus ---- capsules, 5 mg daily in patients with the signs and symptoms of benign prostatic hyperplasia. 1998, Sub-Investigator.

A randomized, double-blind, placebo-controlled, multicenter, comparative, safety and efficacy study of intravenous ---- (4 and 8 mg) in prostate cancer patients with metastatic bone lesions receiving antineoplastic therapy. 1998, Principal Investigator.

A phase III at home use study evaluating the efficacy and safety of escalating doses of ---- 2, 4, and 5 mg in the treatment of male erectile dysfunction. 1998, Sub-Investigator.

A phase III, long-term, open-label, flexible dose, and safety extension study of ---- tablets in the treatment of male erectile dysfunction. 1998, Sub-Investigator.

Post approval study for the ---- Endoprosthesis for prostatic obstruction. 1998, Sub-Investigator.

Post approval study for the ----- Endoprosthesis for treating recurrent bulbar stricture disease. 1998, Sub-Investigator.

A multicenter pilot study to evaluate a transvaginal approach for the treatment of stress urinary incontinence in women. 1998, Sub-Investigator.

Validation Study of the dry mouth questionnaire and four versions of a urinary incontinence diary. 1998, Sub-Investigator.

Multicenter, double-masked, dose-ranging study of ----- vs. Placebo in men with voiding dysfunction or benign prostatic hyperplasia. 1997, Sub-Investigator.

A multicenter, double-blind, randomized, parallel group, dose titration study comparing the difference in dry mouth in patients treated with ---- and ---- for urge urinary incontinence. 1997, Sub-Investigator.

A multi-center, open label trial to study safety and efficacy of ---- Implantable Therapeutic System in patients with prostate cancer. 1997, Sub-Investigator.

A phase III, long term, flexible dose, efficacy and safety study of ---- tablets in the treatment of male erectile dysfunction. 1997, Sub-Investigator.

A phase III efficacy and safety study of four fixed doses of ----- tablets versus placebo in the treatment of male erectile dysfunction. 1997, Sub-Investigator.

A randomized, double-blind, placebo-controlled, two years parallel group study of the efficacy and safety of ----0.5 mg in the treatment and prevention of progression of benign prostatic hyperplasia. 1997, Sub-Investigator.

Clinical trial to assess efficacy and safety of ---- in patients with hormone-refractory stage D2 prostate cancer. 1997, Principal Investigator.

Phase II multi-center, open-labeled study of ----, administered as a subcutaneous, continuous infusion of 57 to 85 days ( 8 to 12 weeks) in patients undergoing radiation therapy interstitial seed implantation or other radiation therapy. 1997, Sub-Investigator.

An open-label, 24 month trial of 40 mg of oral ---- in patients with minimal erectile dysfunction. 1997, Sub-Investigator.

Patient Satisfaction with Cardura and Hytrin for Benign Prostatic Hyperplasia. 1997, Sub-Investigator.

Dose-finding study for delivery of anesthesia to the female urethra via iontophoresis. 1997, Sub-Investigator.

A randomized, double blind, placebo controlled, efficacy and safety study of oral ----- in patients with recurrent herpes labialis. 1997, Sub-Investigator.

A randomized, double blind, placebo controlled, efficacy and safety study of oral ----- in patients with recurrent genital herpes. 1997, Sub-Investigator.

Open-label safety and dose conversion/determination study of ----- for urge urinary incontinence. 1997, Sub-Investigator.

An open-label 24 month trial of 40 mg Oral ---- in patients with minimal erectile dysfunction. 1997, Sub-Investigator.

Long-term safety, tolerability and clinical efficacy of ----. A phase III open, multinational study in patients with detrusor overactivity, symptoms of frequency, urge incontinence and/or urgency. 1996, Sub-Investigator.

Proof-of-principle study for delivery of anesthesia to the urethra via an iontophertic catheter in 20 women. 1996, Sub-Investigator.

A placebo-controlled, parallel-group, crossover design phase III trial of----- in patients with erectile dysfunction. 1996, Sub-Investigator.

A methodology trial to assess the reproducibility of noninvasive measurements used in the diagnosis and assessment of treatment outcome for subjects with abnormal voiding. 1996, Sub-Investigator.

A phase III long-term, open-label, flexible dose, efficacy and safety study of ----- in the treatment of male erectile dysfunction. 1996, Sub-Investigator.

A phase III efficacy and safety study of three fixed doses of ----- tablets versus placebo in the treatment of male erectile dysfunction. 1996, Sub-Investigator.

A randomized, double-blind, comparative trial of ----- versus placebo in patients with early prostate cancer. 1996, Sub-Investigator.

A double-blind, placebo-controlled, dose ranging clinical evaluation of ----- and Finasteride in subjects with benign prostatic hyperplasia. 1996, Sub-Investigator.

A randomized, multi center, double-blind, double-dummy comparative trial of ----- and Ofloxacin for the treatment of bacterial prostatitis. 1995, Sub-Investigator.

A phase III open, multinational study in patients with detrusor overactivity and symptoms of frequency, urge incontinence and urgency. 1995, Principle Investigator.

A phase III randomized, double-blind, multi-national study in patients with detrusor overactivity and symptoms of frequency, urge incontinence and urgency. 1995, Principle Investigator.

A phase II study of intravesical --- in patients with transitional cell carcinoma of the bladder. 1995, Principle Investigator..

A phase II study of intravesical ----- in patients with carcinoma in situ of the bladder who have failed or have recurrence following treatment with BCG. 1995, Principle Investigator.

A pilot study of ----- in carcinoma in situ patients following BCG treatment failure. 1994, Principle Investigator.

Phase III study of ----- verses intravesical BCG in adult patients with BCG-naive bladder carcinoma in situ. 1994, Principle Investigator.

Phase III study of oral --- vs. Intravesical BCG in Adult Patients with BCG Naive Bladder Carcinoma In Situ, Quality of Life Pharmacoeconomics. 1994, Principle Investigator.

Evaluation of the clinical effectiveness and cost-effectiveness of Terazosin (Hytrin) vs. placebo in the treatment of patients with symptomatic benign prostatic hyperplasia (BPH). 1992-1993, Principle Investigator.
