**EXPERT QUALIFICATION STATEMENT**

I have testified in over 550 cases in firearms-related cases as an expert witness. I began my career in law enforcement 42 years ago. I was trained as a Special Agent in the United States Army Criminal Investigation Division (CID) in 1984 and served as a Special Agent for ten (10) years until my retirement in 1994. As a Federal Agent, I processed, diagrammed, and reconstructed crime scenes as part of the normal course of investigation. In 1989, I trained and studied at the US Army Crime Laboratory for two (2) years in the field of Forensic Firearm and Toolmark Examination. My training included microscopic analysis, the study of ammunition and ammunition components, gunpowder production and manufacturing techniques, reloading of ammunition, toolmark examination, gunshot wound analysis, processing of clothing for gunshot residues, bullet path interpretation, firearm functionality, and shooting reconstruction. I have been a Forensic Firearm Examiner for twenty-seven (27) years. I have worked as a Forensic Firearm Examiner in ASCLD Accredited Laboratories in the US Army and the Los Angeles Police Department. I have thirty-seven (37) years of crime scene processing as both a Special Agent (detective) and as a Forensic Firearm Examiner. Throughout my career I have utilized various scientific methods and techniques to collect, preserve and analyze physical evidence at crime scenes. I have investigated all categories of crimes, e.g. homicides, assaults, and officer involved shootings (OIS), and have conducted war/combat shooting reconstructions from incidents in Somalia and Yugoslavia.

I am qualified as an expert in California Superior Court in the areas of Forensic Firearm and Toolmark Examination as well as Shooting Reconstruction. I am qualified in the US Federal Court system as an expert in Forensic Firearm and Toolmark Identification. I have qualified as a Forensic Firearm Examiner in all branches of the military and NATO Countries (Britain and Canada). I am qualified as an expert in the states of New Mexico and Arizona. I have worked both for defense and prosecution at both the state and federal levels.

I have been trained in firearm-related injuries and have studied at the Letterman Army Medical Center, Preside of San Francisco, and the Armed Forces Institute of Pathology in Washington, D.C. I have attended autopsies throughout my career. I also attended advanced training at the Southwestern institute of Forensic Sciences, Parkland Memorial Hospital, Dallas Texas, in microscopic examination, wound ballistics and the analysis and study of ricochet bullets. See below for further details.
